

# HUGGABLES

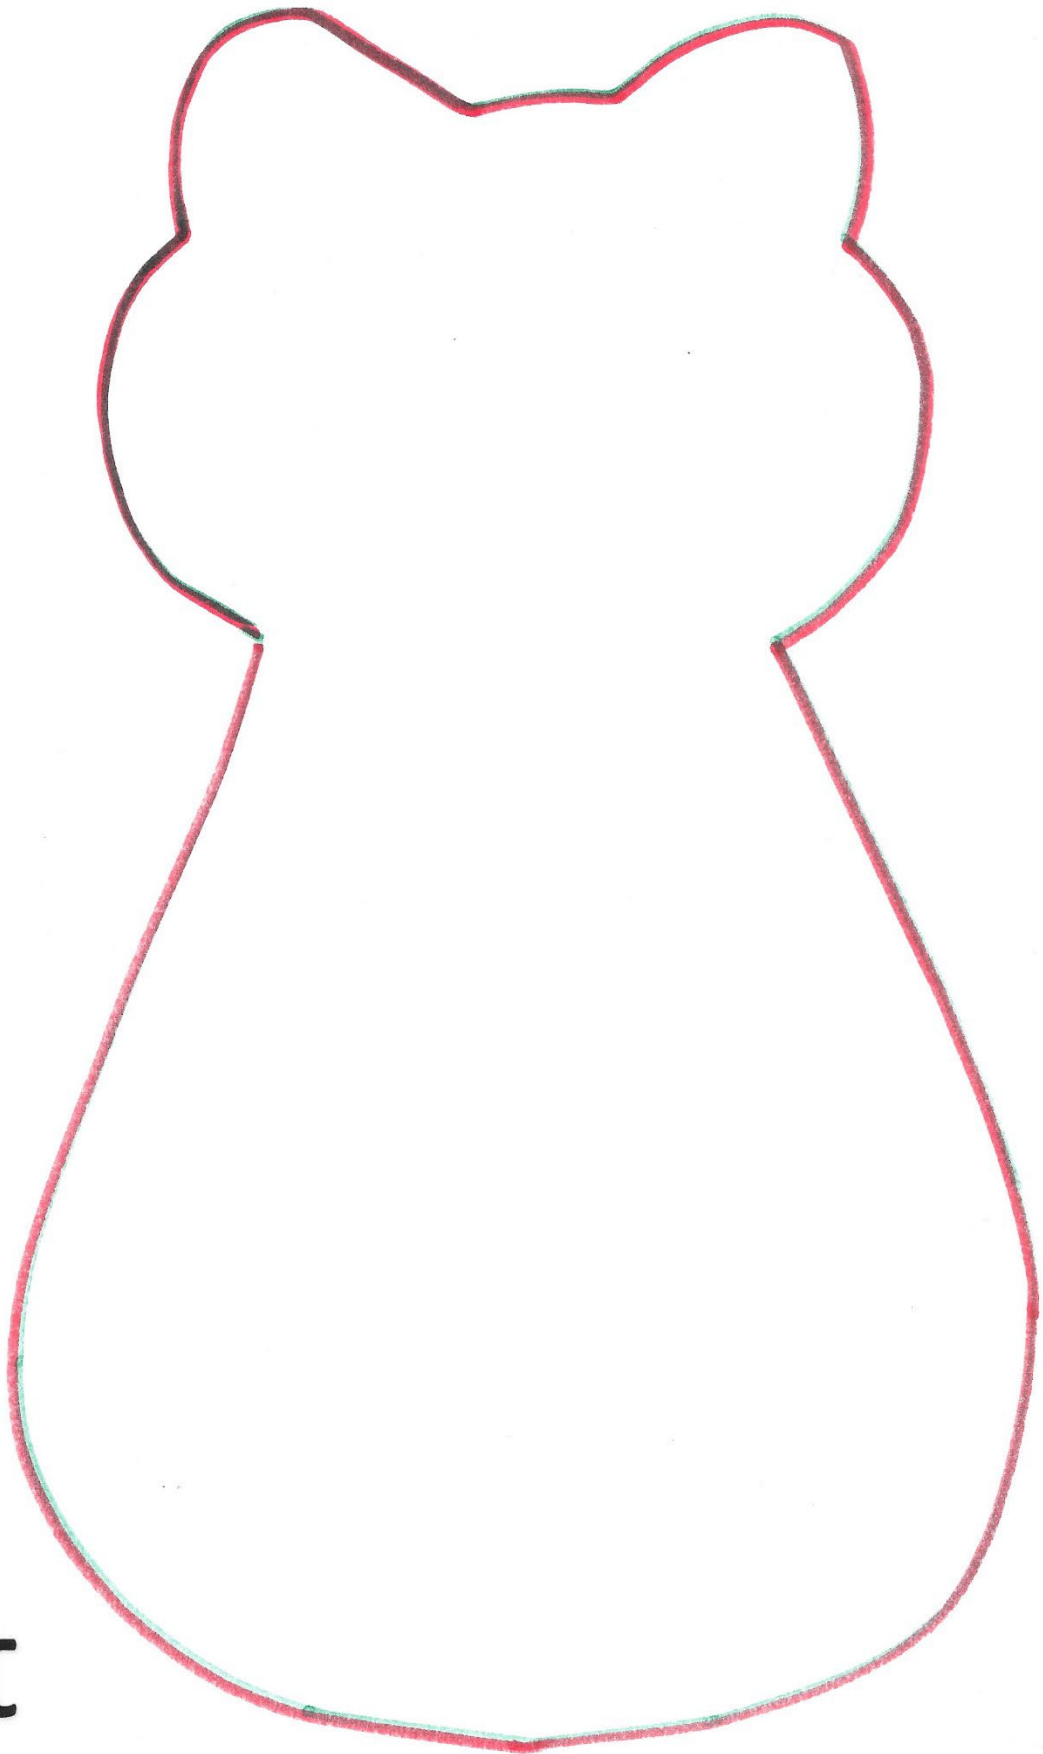

Huggables are soft stuffed animals that comfort our patients. They are sewn with soft material (like flannel) and filled with polyfil.

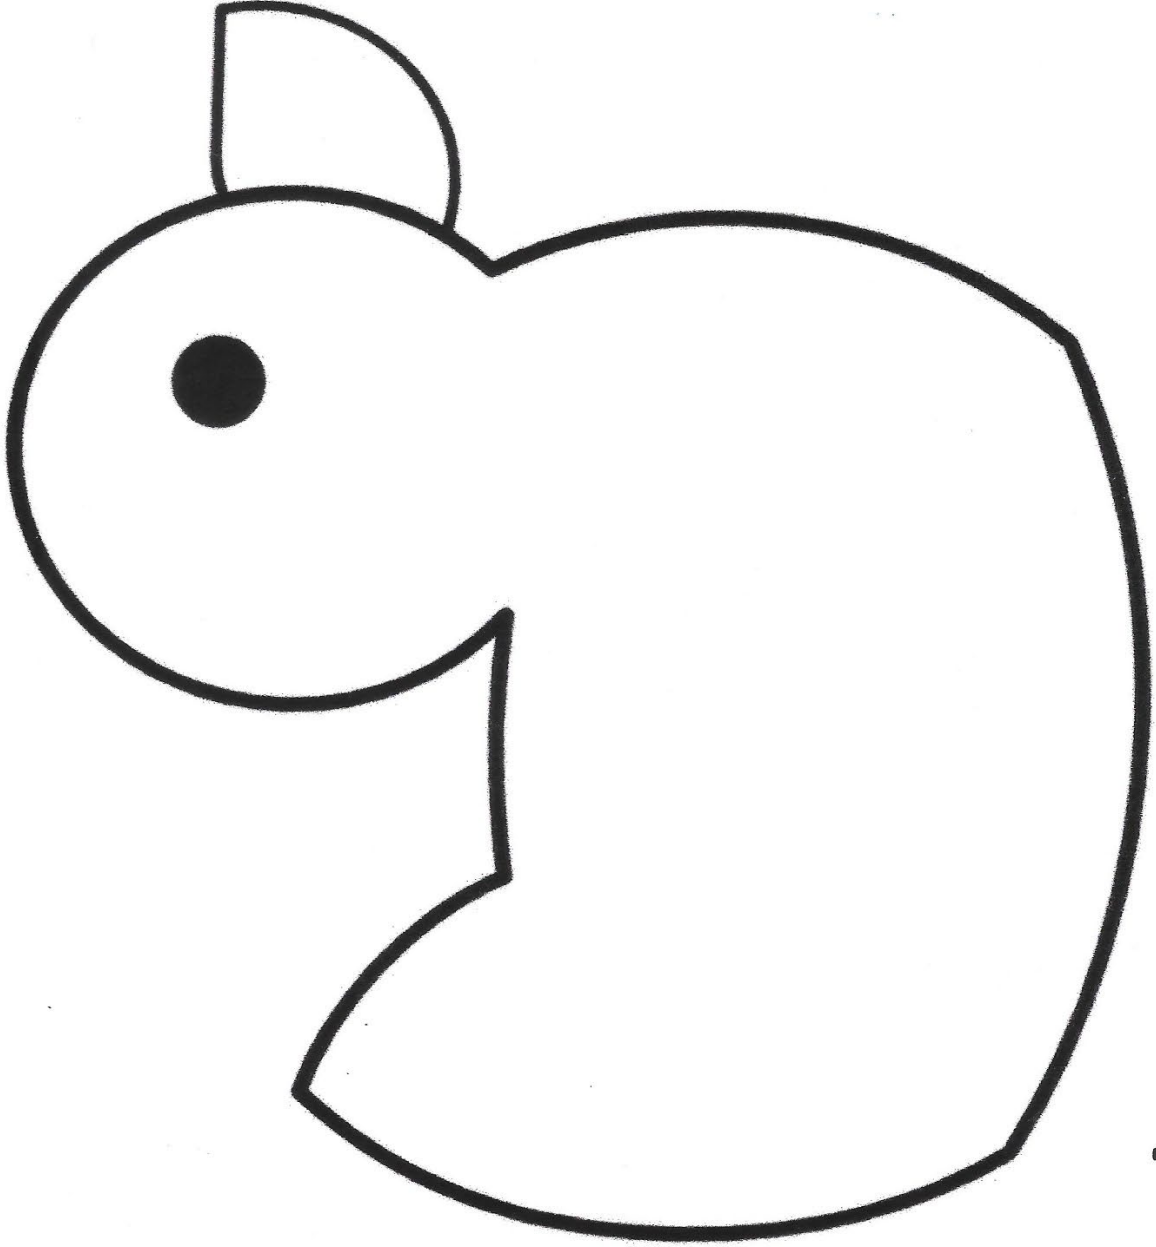

Below are some patterns that you can choose to trace and sew. ( or feel free to choose your own patterns)

Please do not attach any buttons, sequins or objects that can be swallowed or pulled off by little hands. Also double check to make sure any pins are removed. (we also do another quality check when they arrive here.)

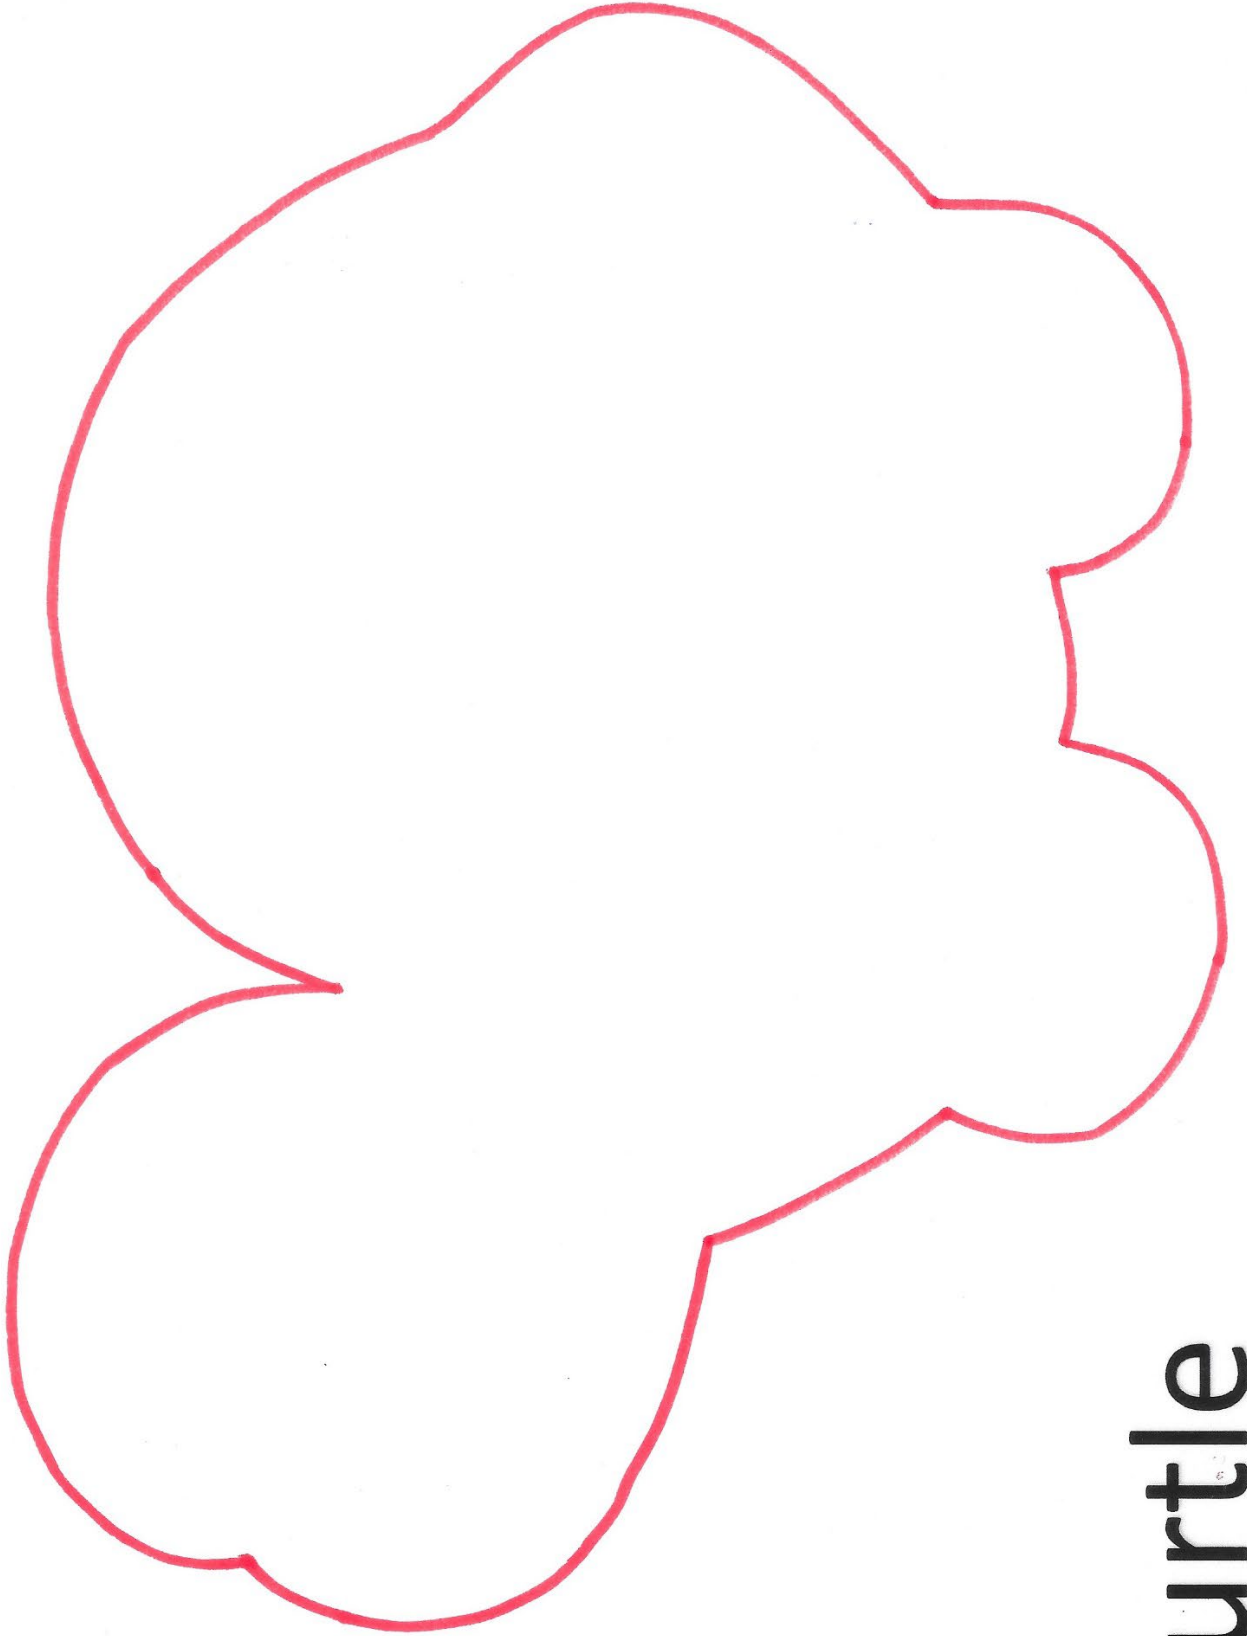

The ribbons that you see on some of the huggables above are placed by volunteers after they arrive at Wake Med.
